

SECUREWON

Protecting Possibilities

Better Learning: Are You Set Up for Success?

Fragmented systems
across departments

Teachers managing IT
without proper support

Redundant tools with
overlapping costs

Lack of data insights
for decision-making

Secure Learning Systems

SecureWon's LMS/SIS assessment helps educational institutions evaluate, improve and integrate their learning and student data systems – while ensuring they remain secure, scalable, and aligned with their long-term tech strategy.

Our Solution

We offer LMS and SIS reviews as part of our tech audits, assessing how well your systems work and where they can be better connected. This includes key operational tools like admissions, enrollment, billing, and development. We also provide cybersecurity support, IT setup, and staff training to ensure smooth adoption and maximum value from your tools.

Benefits & Outcomes

We help schools get the most out of their platforms with integration and data sync troubleshooting, plus configuration reviews for tools like Google Classroom, Blackbaud, Veracross, FACTS, PowerSchool, and Canvas.

Security and access control assessments protect sensitive data, while staff training recommendations empower educators to use technology more effectively – leading to smoother operations, reduced risk, and better adoption of key tools.

Ready to Simplify IT and Strengthen Security?

Let's talk about how **SecureWon** can support your school or organisation.

What SecureWon's Assessment Includes:

1. System Identification

A full inventory of all current systems in use across all departments.

3. Efficiency Analysis

Identification of redundant tasks through staff interviews.

5. Implementation Support

Enabling smooth and successful solution rollout.

2. Compatibility & Integration Review

Determine if your LMS, SIS, and other applications can connect properly.

4. Comprehensive Reporting

Clear report with findings and tailored recommendations.

Our Clients Say It Best

"Having a relationship with SecureWon, and allowing them to monitor our servers is really helpful, and it eases my mind. I've got an expert behind us to make sure we are up and running pretty much 24/7!"

Bob Ogden,
Director of Information Systems,
Pingree School

Why SecureWon

SecureWon has been helping schools with IT and cybersecurity for years. We understand the challenges educators face and provide reliable, cost-effective support built for the education sector.

We offer both tech support and data strategy under one roof, so you don't have to juggle multiple vendors. From devices to data protection, we help schools run smarter and safer.

We're certified, **E-Rate** registered, and fully compliant with school data regulations like **CIPA** and **FERPA**, so you know you're in safe hands.
