

TECHNOLOGY THAT PROTECTS A MISSION OF BELONGING

How SecureWon gave L'Arche the security and stability to focus on the people it serves.

L'Arche is a nonprofit community in Haverhill, Massachusetts, where adults with and without intellectual and developmental disabilities share life together as core members and assistants. Its mission depends on technology it can rely on.

THE CHALLENGE

L'Arche's technology had evolved over time without a clear, unified strategy.

Leadership lacked full confidence in the organization's cybersecurity posture.

Growing cybersecurity demands were becoming difficult to manage without dedicated expertise.

L'Arche needed a clear, prioritized roadmap to guide its technology investments.

THE SOLUTION

SecureWon began with a full cybersecurity and technology assessment, then built a prioritized roadmap for L'Arche's leadership. That roadmap became the foundation for an ongoing managed IT partnership built on SecureWon's Assess, Remediate, Manage methodology.

We conducted executive interviews and technical discovery across the organization.

We strengthened cybersecurity controls and improved network infrastructure.

We ran vulnerability testing and a full infrastructure review.

We enhanced endpoint protection and implemented best practices throughout.

We built a prioritized roadmap and presented it in plain business terms.

We now provide proactive monitoring, cybersecurity management, help desk support, and ongoing strategic guidance.

THE RESULTS

L'Arche now has a technology roadmap aligned with its mission and long-term goals.

The organization's cybersecurity posture is stronger through prioritized remediation.

Proactive management keeps downtime and disruption to a minimum.

L'Arche has a trusted partner for ongoing, executive-level technology guidance.

WHY L'ARCHE CHOSE **SECUREWON**

SecureWon's approach goes beyond a typical managed IT provider. Every engagement starts with a full assessment before any recommendations are made, giving clients like L'Arche a strategic partner who understands their mission as much as their technology. For L'Arche, that partnership means the confidence to focus on the people and communities it serves.

IN THEIR **WORDS**

Jen at L'Arche shared her experience partnering with SecureWon in a video testimonial. She describes the peace of mind that comes with knowing L'Arche's systems and data are protected, along with the trust she's built in SecureWon's team over time. That confidence lets L'Arche's leadership stay focused on the organization's mission, without worrying about what's happening behind the scenes.
